

# Lukasz Jarych

Based in Wroclaw / Europe and open to worldwide remote working  
Email: [luka.jarych@gmail.com](mailto:luka.jarych@gmail.com); Phone/WhatsApp: (+48) 693 222 214; [LinkedIn](#)

## Senior Analytics Engineer

Senior Data Analyst with 12+ years of experience in BI, data modeling, and cloud analytics, delivering measurable business impact across global organizations.

**Drove \$100K+** in cloud cost savings by identifying optimization opportunities through usage and performance analysis. Used **AI Data Agents (Codex, Cursor, GitHub Copilot)** in my daily work (power bi semantic model design, dbt pipelines, fabric A to Z integrations)

Focused on translating data into actionable insights across user behavior, workflows, and business performance, with increasing specialization in product and growth analytics (funnels, retention, and optimization).

### Skills

|                              |                                                                                            |
|------------------------------|--------------------------------------------------------------------------------------------|
| <b>Power BI</b>              | Delivers executive dashboards supporting data-driven business decisions                    |
| <b>Data Modeling</b>         | Structures complex datasets into scalable, high-performance models                         |
| <b>Process Automation</b>    | Eliminates manual work through efficient, reliable workflow design                         |
| <b>SQL Engineering</b>       | Integrates diverse sources into clean, trusted analytical pipelines                        |
| <b>Qlik Development</b>      | Builds optimized BI applications supporting hundreds of end-users                          |
| <b>Cloud Analytics</b>       | Uncovers cost-saving and optimization opportunities through usage and performance analysis |
| <b>Data Visualization</b>    | Transforms raw data into intuitive, insight-rich visual narratives                         |
| <b>Stakeholder Alignment</b> | Translates business needs into actionable, high-impact BI solutions                        |
| <b>Continuous Learning</b>   | Learned Java in 5 months to replace Excel and deployed it in production                    |
| <b>Data Storytelling</b>     | Communicates insights clearly to influence decisions and alignment                         |
| <b>Languages</b>             | English – C1, Russian – B2, German – A2, Polish – C2                                       |

### Career History

| 2018 – present                                                                                                                                                                                                                                                                                                                                                                                                             | Vnomic |  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|---------------------------------------------------------------------------------------|
| <b>Business Intelligence Analyst (Software Engineer)</b>                                                                                                                                                                                                                                                                                                                                                                   |        | 2022 – present                                                                        |
| <ul style="list-style-type: none"><li>Working fully remotely from Europe for this San Francisco-based company, designing, testing, and implementing metadata and data architecture for Vnomic's cloud migration tool using Java and Python.</li><li>Providing data and analytics solutions for Fortune 100 companies, integrating data across SQL, PostgreSQL, Excel, Access, Power BI, and Git-based workflows.</li></ul> |        |                                                                                       |

#### Achievements

- ✓ **Identified** opportunities to save over \$100K in cloud costs by developing Power BI and Vnomic UI reports for Azure Cost Management.
- ✓ **Designed** and implemented full architectures for 5+ customers using Microsoft Fabric, Notebooks, OneLake, and Power Query.

|                                                                                                                                                                                                                                                                            |             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Excel/VBA Developer (Software Engineer)</b>                                                                                                                                                                                                                             | 2018 – 2022 |
| <ul style="list-style-type: none"><li>Developed and maintained a large-scale Excel/VBA application used by 100+ enterprise customers including Coca-Cola, Microsoft, AWS, and Pepsi.</li><li>Collaborated fully remotely using Jira, Teams, SharePoint, and Git.</li></ul> |             |

#### Achievements

- ✓ **Automated** data processing and validation using VBA, Power Query, and advanced Excel features, generating six-figure cost savings
- ✓ **Integrated** data from CSV, JSON, MS Access, and SQL Server sources into a unified reporting solution.

|                                                    |                           |
|----------------------------------------------------|---------------------------|
| <b>2017 – 2018</b>                                 | <b>Experts 4 Business</b> |
| <b>Senior Systems Analyst / IT Systems Analyst</b> |                           |

- Designed and deployed scalable HR reporting and office automation architectures that supported 7 teams and 100+ users.

- Promoted to Senior Systems Analyst in 7 months, and ensured data quality and consistency across HR reports and databases using Excel, Access, VBA, and QlikView

#### Achievements

- ✓ **Improved** operational efficiency by analyzing and standardizing processes across 9 HR teams.
- ✓ **Drove** rapid adoption and reduced downtime by delivering user support and mentoring, including Excel automation and BI tools.

2014 – 2017

Impel Group

Business Analyst

2016 – 2017

- Developed and implemented 10+ automated tools and reports (VBA, QlikView), supporting 7 HR teams and 100+ end-users.
- Delivered first-line technical support for 100+ users to troubleshoot issues and minimize downtime.

#### Achievement

- ✓ **Saved** 20+ hours / week with higher data accuracy by implementing automated SAP reporting workflows.

Sales Analyst / QlikView Developer

2014 – 2016

- Focused on sales performance analysis and was a developer of the QlikView Business Intelligence application for reporting and data visualization.
- Led requirements gathering with stakeholders and implemented BI solutions that aligned with management needs and industry best practices.

#### Achievements

- ✓ **Learned** QlikView in 6 months and designed, tested, and optimized 3+ QlikView applications.
- ✓ **Created** algorithms and visualizations that enabled easy data access for 800 end-users and contributed to the development of a management dashboard for the commercial division.

2013 – 2014

Hewlett-Packard

IT Expert and Accounts Payable Specialist

- Analyzed financial and operational data, built reports, and ensured data accuracy using SAP, Excel, and Access for the Russia Finance department in HP's Global Business Center in Wrocław
- Supported data workflows and collaboration using SharePoint, working closely with cross-functional and international stakeholders to solve complex analytical and process issues.

#### Achievements

- ✓ **Recognized** for speed, reliability, and continuous skill development and promoted to IT Expert in 6 months.
- ✓ **Saved** 75 hours of work per week by automating reporting and finance processes using Excel (VBA), implementing 10+ process improvements for accounting pipelines.

#### ⚙️ Additional Experience

Careerchange2it.com – helping others worldwide to make a career transition into Tech

#### 📖 Education & Professional Development

**Master of Science, Environmental Engineering** Wrocław University of Environmental & Life Sciences 2011

Power BI UI dashboards (2025), Complete QlikView Bootcamp (2022), Microsoft Power BI (2022)

#### 🔧 Technical Skills

**Business Intelligence:** Power BI (Sr), QlikView (Sr), Power Query (Sr), Paginated Reports, MS Fabric

**Data Engineering & Integration:** SQL, PostgreSQL, SQL Server, ETL Pipelines, OneLake, Notebooks

**Automation & Scripting:** VBA (Senior), Python (Pandas – Mid), Java (Mid), MS Access Development

**Cloud & Infrastructure:** Azure Cloud Analytics, Cost Optimization Reporting, Git Workflows

**Data Visualization & Storytelling:** Dashboard design, UX-driven reporting, Gestalt techniques, Executive Insights

**Reporting & Analysis:** Sales Analytics, HR Analytics, Financial Reporting, Multi source Data Integration

**Collaboration & Delivery:** Jira, Teams, SharePoint, Google Workspace, Remote Agile Delivery

#### 🌱 Interests

Travelling: discovering beautiful Europe areas with family (last time, Algavre, Portugal)

Sports: football, swimming, Nordic walking, trekking (Tatry Mountains)

Reading fantasy literature: Tolkien, Feist, Grzędowicz, Sapkowski, Rowling
